DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1 – 4, 7 – 14, and 16 – 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Goddard (U.S. 4,297,629).

Regarding claims 1 – 4, 7 – 14, and 16 - 20, Goddard discloses a method for supplying at least one load (3) during mains failure, wherein a plurality of batteries (1) as an emergency voltage source supply the at least one load (3) during failure of a mains voltage source (2) and are connected to the mains voltage source (2), with the following steps (column 4 lines 25 - 44):

- a) splitting of the plurality of batteries (1) connected in series into at least two battery groups (4, 5)(figure 7 item I1);
- b) connection of each of the battery groups (4, 5) to the mains voltage source (2) for charging (Figure 7 battery terminals, U, are connected to Uc+ and Uc- of the charger or the main voltage), and
- c) series connection of the battery groups (4, 5) for use as the emergency voltage source.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5, 6, and 15, are rejected under 35 U.S.C. 103(a) as being unpatentable over Goddard (U.S. 4,297,629) in view of Kejha (U.S. 5,811,959).

Regarding claims 5, 6, and 15, Goddard does not disclose the invention as claimed. Hall discloses in the abstract wherein the over discharging and overcharging is prevented, thus providing a protection circuit. At the time of invention, it would have been obvious to a person of ordinary skill in the art to modify the Goddard system with the Kejha system so that the system is not destroyed with damaging over discharge and overcharge.
